

# Tate P. Osborne

603-818-0710 | [tate14@proton.me](mailto:tate14@proton.me) | [in/tate-osborne](https://in.tate-osborne) | [github.com/tateosborne](https://github.com/tateosborne) | Exeter, NH, USA | USA & UK Citizenship

## EDUCATION

### Georgia Institute of Technology

*Master's of Science in Computer Science*

Remote, USA

Aug. 2024 – May 2026

- GPA: 3.80\*
- AI Specialization

### University of Vermont

*Bachelor's of Science in Computer Science, Minor in Art*

Burlington, VT

Aug. 2019 – May 2023

- GPA: 3.60
- Dean's List (top 20% of class) in two semesters, with GPAs of 3.82 and 4.0
- Minor GPA: 4.0

## EXPERIENCE

### Software Engineering Intern | C#, .NET Core, SQL, JS, Postman, Git, Jira

*Trimble*

May 2025 – Aug. 2025

*Portsmouth, NH*

- Helped retire a legacy internal tool by implementing REST API, migrating 100% of functionality by adding 5 new endpoints to improve scalability and maintainability.
- Collaborated with teams with up to 9 members to deliver 100% of assigned user stories on time across 4 sprints.
- Joined SCRUM teams to meet sprint deadlines and contributing to planning, stand-ups, and retrospectives.
- Debugged and tested the backend, front-end, and APIs, improving system reliability and code quality.

### Software Engineer Teacher Assistant | Python, Agile

*University of Vermont*

Sep. 2022 – May 2023

*Burlington, VT*

- Assess weekly Python assignments and large group projects for 60+ students, guaranteeing alignment with requirements, code quality, clarity, and providing detailed feedback.

## PROJECTS

### Distributed File System | C/C++, gRPC, Protobuf, POSIX, Git

Nov. 2024 – Dec. 2024

- Built a gRPC client-server system with Protocol Buffers for efficient and reliable remote procedure calls.
- Designed a multi-threaded server using mutex-protected locks to ensure safe concurrent file access for clients.
- Utilized inotify-like file monitoring for real-time sync, achieving efficient updates with minimal resource use.
- Optimized CRC-based validation and deadlines, improving synchronization reliability and fault tolerance.

### Quizlet Competition, Snake | React, TypeScript, Next.js, SCSS, Git

May 2023 – June 2023

- Secured third place in national Quizlet competition with 100+ applicants, demonstrating adherence to guidelines.
- Co-developed a creative Snake game variant with two team members, excelling in full-stack development.
- Completed the project within a two-month timeline, showcasing enthusiasm and strong time-management skills.

### UVMaps | Swift, SwiftUI, Google Firebase, Xcode, Apple MapKit, Git, Jira

Oct. 2022 – Nov. 2022

- Collaborated with four members to develop an iOS app for class route planning for students at UVM.
- Exercised agile software development and managed project tasks and lifecycle using Jira.
- Contributed to full stack development, including backend logic, frontend graphics, and appearance.

### Evolutionary Robotics | Python, PyBullet, NumPy, Matplotlib, Git

Jan. 2023 – May 2023

- Evolutionary robotics project with components such as a neural network-based brain and sensor-equipped limbs.
- Employed iterative programming to continuously enhance functionality towards project goals.
- Designed a fitness evaluation mechanism to evolve the robot for optimal task performance.

## TECHNICAL SKILLS

**Languages:** Python, C#, SQL, Java, C, C++, Rust, HTML, CSS/SCSS, Swift

**Frameworks:** React, Node.js, Angular, SwiftUI, Flask

**Developer Tools:** Git, GitHub, VS/VSCode, NeoVim, Postman, CLI (MacOS/Linux), Jira, Docker

**Libraries:** pandas, NumPy, Matplotlib, PyBullet, PyGame
